

Acoustic Treatment Pack

BASSKEEPER® WALL

Tuned Absorption

BASSKEEPER® WALL is the newest ATP® solution for absorption of low frequencies to mount on walls and ceilings.

When combined with the BASSKEEPER® ANGLE, it provides the best ATP® choice among the low-frequency products.

This bass trap is a 120Hz tuned resonance open box model like the BASSKEEPER® ANGLE and you can match them. These two products together provide a true linear tool and a first class approach to tame low frequencies and take perfect control of the basses.

In most situations these two models solve all serious low-end problems in the room.

Several colours are at your disposal. They look great!

Features:

- NRC average: 0.66 / m2 [> 100 Hz; < 250 Hz].
- EPS Euroclass fire-retardant (NP EN 13501-1).
- Package: 2 units.
