

Acoustic Treatment Pack

COSMOS 60®

Absorbent Panel

COSMOS® is an acoustic panel that presents a set of four different aesthetics that meet all kinds of requirements. It is an acoustic solution for commercial areas, offices, public spaces as well as audio and video studios.

Acoustic designers usually favour this type of covering because it is efficient and has a refined finishing as well. These are inexpensive and very attractive proposals. The 8cm thickness and the inside labyrinth provide COSMOS® with a high absorption coefficient.

This absorbent panel comprises the full spectrum of the human voice and is used to absorb slap and flutter echoes in the room, thus allowing a more pleasant and accurate listening environment.

This panel can be set on T-type false ceilings or glued directly on walls and ceilings.

This model proposes four different perforations and five synthetic-wood finishes, as well as a flexible design with coupling options for the several pieces, therefore enabling different and varied aesthetic combinations.

Features:

- Average NRC: 0.79 /m2
- 4 different types of perforations and 5 different types of wood.
- Self-extinguishable M1 fire-retardant acoustic foam and melamine.
- Package: 4 units or 12 units.
- In stock for immediate delivery.
- Very easy to install.
- T-ceilings ready applications. (COS 60 TC)
- Contact us for information on applications.
